Our Body: The Universe Within will expose the inner workings of human anatomy by presenting actual human specimens, anatomical displays, reproductions of historical anatomical artwork and much more. By presenting an artful, compelling and dignified environment guests will connect with the human artifacts on a personal level that will help them to better understand their own bodies. The exhibit literally, as well as figuratively, goes "under the skin" exposing the intricacy of the human body and allowing the general public to look at what only doctors and scientists normally are allowed to see first hand. Group Admission is \$9 per person. To learn more about the exhibit, please go to the website <https://www.ourbodytheuniversewithin.net>.
